- **SQL:** Proficient.

## Web Development

---

- **HTML:** Proficient.
- **CSS:** Proficient.
- **JavaScript:** Proficient.

## Projects

---

### Frontend Projects

- **Clipboard landing page:** Built a responsive landing page with a focus on clean design and user navigation.
- **Social proof section:** Developed a responsive social proof section, showcasing testimonials and user feedback.

### Academic Project

**School Management System:** Developed a desktop application using VB.NET and SQL, streamlining teacher and student information management with key features like profile management, data organization, and Excel export.

### Personal Project

**Cookie the Bird:** Developed an engaging Android video game as a personal project. The game, built using the Unity Engine, features 'Cookie', a charming bird character that players navigate through a series of obstacles. The game mechanics involve intuitive screen-tapping to control Cookie's flight altitude, providing a fun and interactive gaming experience.

## Certification

---

Microsoft Office 365 from Edraak

2023
